Is Myanmar realigning to a new energy mix?

At the Myanmar Oil and Gas Society annual meeting on 24 January 2021, minister U Win Khaing mentioned that the country is realigning to new energy mix to hydropower 40%, solar 14%, domestic gas 34% and LNG 11%.

Is there a reliable assessment of current and future electricity demand in Myanmar?

Currently, there is no robust and credible assessment of current and future electricity demand in Myanmar.

Does Myanmar have a power supply gap?

Myanmar's power sector will likely continue to experience significant challenges. To sustain the current level of power supply would require adding 300-500 MW every year until 2030. Scenario analysis on the power supply-demand gap illustrates that available generating capacity is projected to not meet the growing demand.

Does Myanmar export natural gas to China & Thailand?

On Myanmar's fiscal year basis (from April to March), the value of natural gas export to China and Thailand increased from US\$3,240 million (MMK 6,804 billion equivalent) in FY2022 to US\$3,975 million (MMK 8,34 billion equivalent) in FY2023.

Should Myanmar develop solar PV?

Developing solar PV can add incremental generating capacity in a relatively fast manner. In the longer term, Myanmar can revive the development of hydropower and LNG-to-power, which were planned in the past or were under construction but did not materialize.

Myanmar's energy consumption per capita is one of the lowest in Southeast Asia due to the low electrification rate and a widespread poverty. An estimated 65% of the population is not connected to the national grid. [2]
