

New Zealand online solar apply

How can solar power help New Zealand?

We're working with the sector on New Zealand's renewable energy and low-emissions transition. We're responsible for the governance and regulation of New Zealand's electricity industry. Solar power can help you become more self-sufficient, reduce your carbon footprint and reduce your energy costs.

Why should you install solar panels in New Zealand?

Solar panels are a clean and renewable source of energy. By harnessing the power of the sun, we can reduce our reliance on fossil fuels and lower our carbon footprint. There are numerous benefits to installing solar panels in New Zealand. One of the main advantages is the potential for significant cost savings on your energy bills.

How are solar panels installed in New Zealand?

The installation process for solar panels in New Zealand typically involves several steps. First, a site assessment is conducted to determine the suitability of your property for solar panel installation. Factors such as roof orientation, shading, and structural integrity are evaluated during this assessment.

What is solar energy in New Zealand?

Learn about solar energy in New Zealand, and its advantages and limitations. In October 2022, Electricity Authority data showed 43,641 solar systems installed across New Zealand, adding up to 240 MW. This makes up an estimated contribution of under 1% of total electricity consumption.

Is going solar a good idea in New Zealand?

Going solar helps the environment - it creates clean, green energy and is a great way to reduce your carbon footprint. Going solar demonstrates your commitment to sustainability and will help New Zealand achieve its target of net zero greenhouse gas emissions by 2050. Is your property suitable for solar?

Does New Zealand use solar?

Globally, solar PV uptake has increased significantly over the past decade. While uptake in New Zealand has been slower to date, there is potential for greater utilisation as technology costs decrease, particularly at the grid-scale and on commercial building rooftops. How much of our electricity comes from solar? 2021 data is sourced from MBIE.

The Kowhai Park Solar Farm is a 170MWdc solar farm adjacent to Christchurch Airport, on land owned by both Christchurch International Airport Limited (CIAL) and Environment Canterbury. Lightsource bp and Contact Energy will develop the solar farm in partnership with CIAL.

EECA built the model along with BusinessNZ Energy Council and The Paul Sherrer Institute. The model is used to inform policy decisions on energy and climate action. Solar is shown to be a key renewable energy
