Development approvals have been granted for New Zealand's biggest planned battery energy storage system (BESS) to date. The 100MW battery storage project is in development by electricity generator and retailer Meridian Energy at Ruakaka on New Zealand's North Island. The site is adjacent to Marsden Point, a former oil refinery.

Hydropower provides about 60% of New Zealand's electricity in a normal year. However, the geographical proximity of the main South Island stations means the power supply is vulnerable to regional low-rainfall years - the "dry year" issue. This vulnerability arises because New Zealand has limited hydro storage capacity.
