

Niue teknoware central battery system

What is a Teknoware central battery system?

Teknoware's range of central battery systems starts with small systems containing just a few dozen luminaires and a single central battery unit up to centrally controlled systems containing thousands of luminaires.

Do Teknoware luminaires need separate data cabling?

The testing of the luminaires is based on individual addresses, and the communication is by means of the power supply cables. Thus, there is no need for any separate data cabling between the luminaires. The luminaires must be addressable, of the Teknoware products with the letter K in the end, or they must have a separate address module.

Where are the central battery systems made?

All our central battery systems and their components, as well as all the accessories and spare parts related to these systems, are designed and manufactured in our own factory in Finland. The central battery systems are always made to order, according to the needs of the customer.

Explore Teknoware Middle East's Central Battery Systems 6 Series, offering advanced power solutions for emergency lighting. Learn about the cutting-edge features, centralized control, monitoring capabilities, and enhanced efficiency designed for safety and compliance in various applications across the Middle East region.

The central battery system in the TKT78C series is particularly suitable for medium-sized buildings. You can choose from models ranging from 4 to 24 output circuits. The maximum battery capacity is 65 Ah. An integrated battery cabinet is included.

Our products cover central battery units, accessories, and spare parts, as well as complete systems that include everything you need to provide emergency lighting for even the most ...

The document provides information on Teknoware's central battery units for emergency lighting systems, including their features, specifications, and monitoring options. Central battery units can operate at 230V or 24V, with ...

Teknoware also manufactures a range of central battery systems. In addition to the standard features, there is also available an automatic addressable testing system. Teknoware's entire product range is designed to meet the ...

Explore Teknoware Middle East's Addressable Central Battery Systems, offering intelligent power solutions for emergency lighting. Learn about the advanced features, addressable control, monitoring capabilities, and enhanced efficiency ...

Niue teknoware central battery system

o Basic technologies of the Teknoware emergency lighting systems - Central battery systems
o Generally used in larger buildings
o Energy back-up from a centrally located battery
o LED or fluorescent lamp as a light source
o Addressable testing and central monitoring via LON or BACnet as an option
