Quick question on battery change do I need to run a BMS reset? Also AGM batteries need 0.5Volt roughly higher Voltage for charging than say Gel, or Regular Lead Acid Batteries, can the LR3 charge AGM batteries reliably? Is it designed and are factory batteries AGM or are they regular batteries? Sep 8, 2020 #2

Hello all, I am planning to replace our 2 House 8D AGM 200ah batteries with 2 new Epoch DP12300H 300ah Lithium Dual Purpose batteries. Partially because our DC bow and stern thrusters are supplied from the house bank, (via the factory) which is really odd and I know it is killing these deep cycle batteries when I blast them with a 525 amp draw multiple times on a ...

Using a 240V AGM charger is a temporary option until you can get a lithium-specific charger. Giant batteries are manufactured with a built-in high-quality 200AMP (BMS) Battery Management System that allows for most charger settings (15A) minimum (except flooded) to be used.

8) How does your Lithium battery compare with lead-acid or AGM batteries? Designed to last 15 years, Fortress Power batteries last at least six times as long as lead-acid or AGM batteries and require only one-sixth

of the space. The energy cost over the lifespan of a Fortress Power battery is just one-third of the cost of a lead-acid battery.

While its true that floodies don't require management, AGM's (and GEL's) do. The main issue is the effect overcharge has on the battery life. The float charge level can't be more than about 13.8V for most AGM's or life shortening impact will be the result. Floodies just boil and loose water but AGM's will boil and sebssequently vent.

2017 - 2022 Super Duty - FORScan AGM Battery Setting - Several months ago I swapped my original batteries for a set of AGM batteries. There have been posts mentioning using FORScan to change battery type to AGM, and also a suggestion to do a BMS reset. I tried piggy backing off another thread with some questions I...

Today I replaced an old flooded battery with an agm in my 2016 Explorer. Same group size and very similar CCA as the flooded battery. I do have access to Forscan, but I've read on many Ford vehicles you can reset the BMS (battery monitoring system) without it, and that applies to my vehicle as well.

AGM batteries were originally developed in the 1970s for telephone boxes and computer rooms (yes, back when a computer took an entire room.) Their sealed design makes them nonspillable, making them ideal for onboard power in fighter planes, submarines and motorcycles. AGM batteries are the best car battery for vehicles with auto start stop ...

Giant Lithium Deep Cycle Batteries are the best Australian Made deep cycle batteries. They are perfect for virtually any application where you typically use large lead-acid or AGM batteries for reliable 12V power. They may look reasonably similar to AGM batteries, but internally the Giant Lithium is a different, next-generation concept.
