

Increasing vehicle power and battery capacity, while reducing charging time and weight are priority considerations in electric vehicle battery design. While these considerations have always been important, battery technology, power supply capability, and semi-conductor capacity have been somewhat prohibitive of a solution impacting all: increasing the voltage of the battery. ...

This 15kWh high voltage LiFePO₄ solar battery is a smart and cost-effective solution for residential energy storage, with a battery voltage of 307.2V and the ability to connect up to 6 machines in parallel, providing backup power and energy independence for homes, small businesses, farms and more.
