

Swedish start-up Northvolt announced on Tuesday a breakthrough in its sodium-ion battery technology, developed for use in energy storage systems. The battery ...

Swedish start-up Northvolt announced on Tuesday a breakthrough in its sodium-ion battery technology, developed for use in energy storage systems. The battery does not involve the use of lithium, cobalt or ...

Swedish lithium-ion battery manufacturer Northvolt received EU approval for a substantial EUR902m (\$986.43m) German state aid package on Monday to build an electric vehicle (EV) battery production plant in Heide, Germany.. This financial backing, without which the company would have turned to the US instead, will contribute significantly to Europe's green ...

Battery manufacturer Northvolt has announced the production of the first lithium-ion battery cell made from 100% recycled nickel, manganese, and cobalt. According to ...

Gigafactory company Northvolt and sodium-ion battery technology firm Altris have together revealed a battery with an energy density of 160Wh/kg, designed for energy storage systems. Northvolt and Fluence on European manufacturing: "Level playing field" and "right signals" needed.

MONTREAL - Northvolt AB has filed for bankruptcy protection in the United States, but said the move will not jeopardize the manufacturer's planned electric vehicle ...

Scania and Northvolt have unveiled a jointly developed battery cell for heavy electric vehicles. Scania says that in validation tests the lithium-ion cell has demonstrated an ideal lifetime resulting in the capacity to power trucks for 1.5 million kilometres - equivalent to the truck's whole lifetime.

As part of the plans, Volvo also looks to source 15 GWh of battery cells per year from the existing Northvolt Ett battery plant in Skellefteå, Sweden, starting in 2024.

Northvolt has one battery plant in operation in northern Sweden. It also has a plant under construction in Germany, with an additional \$5 billion plant being planned in Canada.

Northvolt, a premium supplier of sustainable battery cells and systems, has announced raising \$1.2 billion in an extension of its convertible note to finance expansion in Europe and North America. This funding builds upon a ...

Swedish start-up Northvolt announced on Tuesday a breakthrough in its sodium-ion battery technology,

developed for use in energy storage systems. The battery does not involve the use of lithium, cobalt or nickel, and could remove global dependence on China, which dominates critical material supply chains within the energy transition, the ...

Gigafactory company Northvolt and sodium-ion battery technology firm Altris have together revealed a battery with an energy density of 160 Wh/kg, designed for energy storage systems. The firms revealed the battery's energy density today (21 November) following a research partnership and Northvolt's investment in Altris in May 2022.

The new factory will receive its supply of lithium-ion battery cells from Northvolt Ett gigafactory in Skellefteå, Sweden. Free Report How attractive are current investment opportunities in Europe? Europe has been identified as one of the most favorable regions for investors, seeing high investment activity in the past year. Most of these ...

Swedish lithium-ion battery manufacturer Northvolt received EU approval for a substantial EUR902m (\$986.43m) German state aid package on Monday to build an electric vehicle (EV) battery production plant in Heide, Germany.

In September, Northvolt outlined a review of operations in Sweden which will result in the loss of 1,600 jobs. The restructuring comes amid slowing sales of battery electric vehicles (BEVs) in Europe.

Pia Aaltonen-Forsell said: "Having followed Northvolt's impressive growth for many years, I'm energized to join its 6,000 employees on their mission to produce the world's highest quality ...

Northvolt, a premium supplier of sustainable battery cells and systems, has announced raising \$1.2 billion in an extension of its convertible note to finance expansion in Europe and North America. This funding builds upon a \$1.1 billion convertible note signed in July 2022, making the total raised in the convertible round \$2.3 billion.

Battery manufacturer Northvolt has announced the production of the first lithium-ion battery cell made from 100% recycled nickel, manganese, and cobalt. According to Northvolt, the inputs for the battery were recovered from battery waste through a low-energy hydrometallurgical treatment that involves the use of an aqueous solution to isolate ...

Swedish lithium-ion battery manufacturer Northvolt received EU approval for a substantial EUR902m (\$986.43m) German state aid package on Monday to build an electric vehicle (EV) battery production plant in Heide, ...

Global battery storage system integrator Fluence raised its full-year guidance again after a strong third quarter, while revealing battery cell orders with AESC and Northvolt. The company's financial year runs to 30

September making April-June its third quarter, and it released its quarterly results yesterday (9 August).

Northvolt, a premium supplier of sustainable battery cells and systems, has announced raising \$1.2 billion in an extension of its convertible note to finance expansion in ...

MONTREAL - Northvolt AB has filed for bankruptcy protection in the United States, but said the move will not jeopardize the manufacturer's planned electric vehicle battery plant in Quebec --

Volkswagen has substantially written down its 21% stake in Northvolt, a Swedish battery cell manufacturer, following the company's recent filing for bankruptcy ...

Volkswagen has substantially written down its 21% stake in Northvolt, a Swedish battery cell manufacturer, following the company's recent filing for bankruptcy protection in the US, reported ...

Europe's homegrown battery industry has taken another hit this month as both Northvolt and VW scale back battery production plans. Following an initial strategic review of ...

Gigafactory company Northvolt and sodium-ion battery technology firm Altris have together revealed a battery with an energy density of 160 Wh/kg, designed for energy storage systems. The firms revealed the ...

Following battery start-up Northvolt's US bankruptcy filing (under Chapter 11 for reorganisation) the company announced that Peter Carlsson will step aside from his role as CEO. However, he will ...

Swedish lithium-ion battery manufacturer Northvolt received EU approval for a substantial EUR902m (\$986.43m) German state aid package on Monday to build an electric ...

Swedish start-up Northvolt announced on Tuesday a breakthrough in its sodium-ion battery technology, developed for use in energy storage systems.. The battery does not involve the use of lithium, cobalt or nickel, and could remove global dependence on China, which dominates critical material supply chains within the energy transition, the company said ...

Europe's homegrown battery industry has taken another hit this month as both Northvolt and VW scale back battery production plans. Following an initial strategic review of its operations, Northvolt plans to put a primary focus on its large scale cell manufacturing, deprioritising its cathode and energy storage systems production.

Gigafactory company Northvolt and sodium-ion battery technology firm Altris have together revealed a battery with an energy density of 160 Wh/kg, designed for energy ...

Northvolt will obtain 100 percent of the energy needed to produce the battery cells regionally in northern

Northvolt battery Turks and Caicos Islands

Sweden and exclusively from wind and hydroelectric power (HEP) - which BMW described as ...

Northvolt develops new tech for battery. Northvolt says the cell has been validated for an energy density of over 160 watt-hours per kilogram at the company's R& D and industrialisation campus ...
