

What is energy in Sudan?

Energy in Sudan describes energy and electricity production, consumption and imports in Sudan. The chief sources of energy in 2010 were wood and charcoal, hydroelectric power, and oil. Sudan is a net energy exporter. Primary energy use in Sudan was 179 TWh and 4 TWh per million persons in 2008.

How can Sudan achieve energy self-sufficiency?

Encouraging solar and wind power in the country's energy portfolio could help Sudan achieve its goal of energy self-sufficiency. Egyptian policies such as nurturing and promoting renewable technologies and scientific research, feed-in tariffs, and tax exemptions could help Sudan achieve its objectives.

What are the challenges facing Sudan's energy sector?

Sudan's energy sector is facing numerous challenges: persistent blackouts, an inadequate energy infrastructure, and a poor and scattered government response.

Can geothermal energy be exploited in Sudan?

Some of the few available studies have revealed such potential. Geothermal energy has been discovered in the Suwakina area, the Jebel Marra volcanic mountains, and other remote areas. Geothermal data collected from oil wells reveals huge potential for exploiting geothermal energy in many areas of Sudan.

How can Sudan restructure its energy sector from Morocco?

One of the most useful strategies Sudan can adopt from Morocco is the use of new legislation and new policies to restructure the energy sector. This recommended adjustment could encourage future investments targeting renewable production and attract more foreign and local investors to participate in renewable production projects.

Is Sudan's Energy Sector Sustainable?

Further, Sudan's energy sector is currently subsidised by the government. Government subsidies to the sector totalled \$667 million in 2019. This represents 13.5% of total government expenditures. Financial sustainability could be achieved by introducing gradual tariff adjustments.

5 · Assala Energy, which operates all the Shell Gabon fields bought for nearly \$600m in 2017, is owned by Carlyle International Energy Partners (CIEP), Carlyle's oil investment fund. Delicate political timing. Citibank is handling Carlyle's sale of its Gabonese assets. The divestment could be of great benefit to the Gabonese state, a few months ...
