

Who is CWP renewables?

Founded in 2007, the CWP group began its journey as a developer of windfarms in Southeast Europe. Building on two key early successes - the first wind farm in Serbia (Cibuk 1,158 MW) and the largest on-shore wind farm in Europe (Fantanele-Cogealac, 600 MW) - the company expanded its operations to Australia, under the name CWP Renewables.

What makes CWP a good company?

Stamenov's conviction in renewable energy resources filters throughout the company, as CWP takes great pride in developing utility scale wind and solar parks across Southeast Europe (SEE), providing effective solutions to its sizeable pollution problems. "The system has such a high dependency on poor quality lignite and coal.

Where is CWP developing a wind farm?

CWP is developing this renewable project in the municipalities of Srbobran and Becej in Serbia. Furthermore, the calculated expected annual gross production of the entire wind farm is around 1,100 gigawatt hours (GWh), which is enough to supply more than 260,000 households with green electricity.

CWP is the pioneering renewable energy developer in Southeast Europe, having successfully realised some of the largest wind farms in the territory. "I believe that there is no more important job today than to help ...

CWP Global's AMUN hydrogen project near the city of Tan Tan in Morocco will be explored as a starting point in the study. The complex is planned to be powered by 15 GW ...

CWP is targeting financial close on up to four renewable projects in South-east Europe this year, two in Serbia and two in Romania. It is looking to close non-recourse project ...

CWP Europe's CEO Dimitar Enchev said on the occasion: „We are excited to welcome PowerChina Resources as our partner in the 300 MW Vetrozelena wind farm. This landmark project will be the largest wind farm in Serbia and one of the largest in the region upon its completion in 2025. Representing one of the largest foreign direct investments ...

Southeast Europe-focused renewables designer CWP Europe introduced on Friday the purchase of the 134-MW Studina solar project in Romania for an unrevealed amount. Image: CWP Global. The business said in a statement it anticipates to begin building deal with this project this year as well as to have it up and running by the end of 2024.

CWP Europe, vodeći međunarodni investitor u obnovljive izvore energije u regionu, i kineska kompanija PowerChina Resources potpisali su ugovor o ulaganju u projekat vetroelektrane Vetrozelena. Kompanija iz
