

Apparently there are now three frontend modes, storage, auto-gen, and yaml. I seem to be "stuck" in auto-gen mode I have been using HACS for awhile and since I ended up in auto-gen mode I have had this issue that HACS will not automatically add resources when a repo is installed. According to the dev resources will not be automatically added in "auto-gen" ...

Hi all, I'm running Homeassistant on a Synology DS918+ on a VM. I noticed the used storage keeps on increasing in Synology VMM. It currently is at ~30GB. Comparing this by `df -h` command I see a delta of ~10GB: Any ...

In order to not overload Home Assistant with log data, only the 50 last errors and warnings will be stored. Older entries are automatically discarded from the log. It is possible to change the ...

Can someone give me detailed instructions on accessing the hidden files in ".storage" ? I just got a brand new HA Blue and in the process of getting it going I somehow have the wrong username and password. Instructions under Authentication - Home Assistant mention deleting some files from .storage but nobody gives details on how to do it. Unfortunately SSH ...

Hetzner has a product called Storage Box which you can mount to your Home Assistant server using the new Network Storage feature. I have been using this to have my backups off-site for ...

I've got a python script that uploads all files (backup snapshot files) to Azure blob storage. I've created an automation that takes backup every week. I'm using Appdaemon for my python script but don't understand how to trigger it. I want to trigger the script each night.

I have 128GB of storage on my Home Assistant Blue and it is currently at 99%. I cannot update/restart or install addons anymore, but I also can't find out where this storage comes ...

Hi, I have installed HA with Home Assistant Operating System approach on pi4, 128GB SD card. My recorder is set at 10 days. I configured some backup and store only one copy on local and the rest to Google drive. Recently I got warning about usable space is low (<10GB), I have no idea what eat up my space the most. I checked my log and only a few MB used. Is ...

Hi all, I'm running Homeassistant on a Synology DS918+ on a VM. I noticed the used storage keeps on increasing in Synology VMM. It currently is at ~30GB. Comparing this by `df -h` command I see a delta of ~10GB: Any ideas why this is different? I installed portainer to see if there are old images/containers which could be removed. This was not the case. I did had ...

Palau home assistant storage

Home Assistant is open source home automation that puts local control and privacy first. Powered by a worldwide community of tinkerers and DIY enthusiasts. Perfect to run on a Raspberry Pi or a local server. Available for free at home-assistant.io.

Would like to maybe see an easier option to select "storage" options for the HAOS system and/or it's add-ons. I have been using HAOS since starting with it in late July 2024 when I learned about Frigate NVR. It has been a learning experience using YAML and configuring it all to make it work on my Pi3 B v1.2. Early August I upgraded by purchasing Pi5 8GB, Pi ...

Hey Folks, it took me hours to find out, where the mountpoint of the Network Share, added in the frontend (Network Storage), is. It's only visible in the Filesystem of the supervisor (I'm running on HAOS) and is there in Question is now, what is the correct path, if i try to use a backup automation. Config looks like this: and it works if I do a manual Backup, but ...

Until the Varta Storage integration (Add vartastorage integration by Vip0r · Pull Request #63736 · home-assistant/core · GitHub) is accepted, you can access the Varta Storage via Modbus. The following snippets are for the ...

Home Assistant allows you to use NAS as extra storage but not a USB storage device. Now you can move the home assistant data to the USB drive and then use it that way. But I don't want to move my home assistant install. I know some users run plex or Frigate. They run into the issue of running out of storage even though using a NAS is the safest way to keep ...

Hello, Every few hours I get "Network storage device failed". The network storage is attached to Raspberry Pi (OMV) and is normally accessible from local computers when HA comes up with this message. After I hit "reload" the message disappears. Anyone experienced something similar?

Choose Configuration tab (at the top), mine had 4 balloons above the "ignore pattern" box including .storage which I removed by pressing the x then clicking SAVE at the bottom right. This prompted a restart of the add-on. Following this the .storage folder was visible in my file editor under config/ and I was able to access the files.

Hi, My Home Assistant storage is regularly full, so I have to delete some backups to continue using it. My first thought was that frigate was using most of the space, but after deleting all of the clips, snapshots and recordings my storage is still 90% full. According to frigate the "recording & snapshots" location is using 103GB+.

Developers recommend a class 10 sd card with 32 GB of storage but I only have a old 16GB sd card from my phone . Does anyone run out of storage with 16Gb? ... Home Assistant Community Is 16GB of storage enough to run HA? Installation. BlackBerry_pi (Zing) February 24, 2018, 12:24pm 1. Hey everyone, is 16 GB of storage enough ? Developers ...

Palau home assistant storage

Hello. I run Home Assistant on a Home Assistant Blue. Today, I noticed that the storage space on 128GB is full. On January 1, 2024, the storage was 22% full, so something has escalated recently. I have removed all backups stored on Home Assistant, keeping them on Google Drive. The latest snapshot is 14GB, much larger than previous ones. In the Backup ...

I'm in the market for an UPS solution that will bear roughly 300-400 watts (my low-power server rack) for over an hour. Traditional UPSes seem to be absurdly expensive for anything above 10 minute runtimes. To add insult to injury, most UPSes would require serial or USB cabling to integrate into HA (all tricky, given how the machines are put together, and ...

Hi, I have a couple of questions I'm hoping someone can help with... I have a Home Assistant Green, and I would like to know if there is a way to increase the storage from 32GB. I found the settings to add external storage (NAS) to Backup, Media and Share (which I have done with an NFS share), but I don't have the ability to move my data disk to any of ...

I've defined a new network storage for backup using Samba to my NAS. How can I check if it's working? So from now on all the backup will be stored on network storage instead of local backup folder? Will this work with ...

Hi everyone! I've just installed HA on a mini pc with in a primary SSD and a slave HDD. In order to do not use the SSD as the disk to store the historical data, logs, etc... I'd like to move them into the HDD. I know, it has less performance than the SSD but, you know, SSD are not really designed for high updated data changing continuously. Is there any way to do that ? it ...

2022-02-04 08_51_27-Home Assistant 1013×629 22.9 KB. ... It is still at 90% storage capacity. mrbilky (Mrbilky) February 23, 2022, 6:19pm 7. Version as to the QCOW version. abhi.ko (Abhi) February 23, 2022, 7:10pm 8. Yeah nothing worked. I just nuked the old VM and started fresh, and restored from backup. ...

Hi All, I am running an Ampere.Storage PRO Inverter, which is definitely a SAJ HS2 Series with some minor changes. After long research I found the Modbus Datamodel and implemented it in telegraf which streams the data into InfluxDB. To visualize the data, I am currently using a Grafana dashboard. In general, it works pretty good so far. There are a few ...

QuestDB state storage (QSS) custom component for Home Assistant Repository: CM000n/qss: QuestDB State Storage (QSS) Custom Component for Home Assistant to store entity states inside a QuestDB. (github) QSS makes it possible to transfer state information of the Home Assistant entities simply and efficiently via InfluxDB Line Protocol into ...

Long time state storage (LTSS) custom component for Home Assistant NOTE: Starting 2020-09-13 attributes are stored with type JSONB instead of as a plain string, in addition a GIN index is created on this column by

default. At first startup after updating of LTSS, migration of your DB happens automatically. Note that this can take a couple of minutes and HASS will ...

Hello, Every few hours I get "Network storage device failed". The network storage is attached to Raspberry Pi (OMV) and is normally accessible from local computers when HA comes up with this message. After I ...

Congrats to Home Assistant for earning the top spot for favorite self-hosted software in a recent user survey! r/homeassistant o I'm excited to share that after countless hours of hard work on optimization, stability and bug fixing, Bubble Card v1.4.0 now operates with almost zero resource consumption once loaded (tested on a full Bubble Card ...

Until the Varta Storage integration (Add vartastorage integration by Vip0r · Pull Request #63736 · home-assistant/core · GitHub) is accepted, you can access the Varta Storage via Modbus. The following snippets are for the Varta pulse neo. # Modbus Varta pulse neo modbus: - name: "mb_varta" type: tcp host: 192.168.40.4 # replace with your ip of the your ...

I notice the entity_registry moved into .storage with the 0.77.2 release. I know we are not meant to customize these files anymore like we were doing to entity_registry.yaml for name changes but my questions is when backing up the .homeassistant configuration is it a good idea to backup this folder or should it be excluded because it will simply rebuild itself?

Home Assistant is open source home automation that puts local control and privacy first. Powered by a worldwide community of tinkerers and DIY enthusiasts. ... Storage full . I have 128GB of storage on my Home Assistant Blue and it is currently at 99%. I cannot update/restart or install addons anymore, but I also can't find out where this ...
