

Does Palestine have solar energy?

Solar energy Palestine has high solar energy potential about 3000 sunshine hours per year and high annual average of solar radiation amounting to $5.4 \text{ kW h/m}^2/\text{day}$ on horizontal surface.

What is the future of solar energy in Palestine?

Solar energy can be a major contributor to the future Palestinian energy supply, with its high potential in the area. Palestine receives about 3,000 hours of sunshine per year and has an average solar radiation of 5.4 kWh/m^2 . Domestic solar water heating (SWH) is widely used in Palestine where almost 70% of houses and apartments have such systems.

Can solar energy be used for water heating in Palestine?

Solar energy is already extensively utilized in domestic water heating but it is not widespread use in the commercial feasibility for producing electricity especially considering that Palestine has 3000 sunshine hours per year and an annual average of solar radiation of $5.4 \text{ kW h/m}^2/\text{day}$.

Is Palestine a good place to invest in solar energy?

Palestine has some of the highest rate of solar water heating in the region, and there are a number of solar power projects. A number of issues confront renewable energy development; a lack of national infrastructure and the limited regulatory framework of the Oslo Accords are both barriers to investment.

What is the average solar radiation in Palestine?

The solar radiation on horizontal surface varies from $2.63 \text{ kW h/m}^2/\text{day}$ in December to $8.4 \text{ kW h/m}^2/\text{day}$ in June. Fig. 16 presents the monthly average of solar radiation in four cities in Palestine: Salfeet and Tubas in the north part of West Bank, Ramallah in the middle part of the West Bank and Hebron in south part of the West Bank in year 2010.

How many homes in Palestine use solar energy heaters?

Over half of all households in Palestine utilise solar energy heaters, although only 3% of houses depend on it as their main source. A 710kW photovoltaic plant was commissioned in September, 2014 in the vicinity of Jericho; it is the largest plant in Palestine to date.
