The first modern humans are believed to have inhabited South Africa more than 100,000 years ago. [1] In 1999, UNESCO designated the region the Cradle of Humankind World Heritage site. [2] South Africa's first known inhabitants have been referred to as the Khoisan, the Khwe and the San. Starting in about 400 AD, these groups were then joined by the Bantu ethnic groups who ...

The first Prime Minister of South Africa, Louis Botha (sitting at the centre of the desk), with his First Cabinet, 1910.. The position of Prime Minister was established in 1910, when the Union of South Africa was formed. He was appointed by the head of state--the governor-general until 1961 and the state president after South Africa became a republic in 1961.
