

Can solar energy replace fossil fuels on Pitcairn Island?

Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy. The goal is to replace 95% of the current diesel consumption on Pitcairn Island (75,000 liters per year) with a combination of energy saving and solar electricity through the installation of a hybrid photovoltaic solar energy system.

What is phelas energy storage?

We at phelas are developing an electricity storage system to use solar and wind power even when the sun is not shining and the wind is not blowing. Our Aurora Liquid Air Energy Storage (LAES) system is at the heart of this vision, transforming renewable sources into a stable, around-the-clock power supply.

Are the Pitcairn Islands Green?

Pitcairn Islands, a group of five islands with a total area of 47 km² and which constitute one of the most remote archipelagos in the world, turn to safer, greener energies that best meet the needs of the population. Pitcairn's authorities have launched a renewable energy project designed to replace fossil fuels with solar energy.

Why is phelas based in Munich?

Phelas: Munich as a location has contributed a lot to the Phelas story. First off, three of our four founders are from here, which means we're united by a shared hometown. What's much more important for Phelas, however, is the support from TU Munich that we received in the early stages.

What is more important for phelas?

What's much more important for Phelas, however, is the support from TU Munich that we received in the early stages. That has given us even better access to the very strong existing local network of industry and research.

phelas, a provider of long-duration energy storage solutions, secured EUR4.1 million (~\$4.5 million) in seed funding. The round was led by E44 Ventures, an Israel-leading ...

innovative ways of reinforcing the renewable energy market through Liquid Air Energy Storage (LAES) solutions. ...

Munich-based phelas, a pioneer in the energy storage sector, announced Wednesday that it has secured EUR4.1M in a seed round of funding. The funding round is led by E44 Ventures, an Israeli climate tech fund, with participation from Axon Partners Group, Deutsche Telekom hub:raum Fund, BNV Partners, other investors, and existing angel investors.

The power generated from the project is sold to Solar Energy Corporation of India under a power purchase agreement. The power is sold at the rate of \$0.04kWh for a period of 25 years. Contractors Involved. Tata Power Solar Systems was selected to render EPC services for the solar PV power project.

phelas, a provider of long-duration energy storage solutions, secured EUR4.1 million (~\$4.5 million) in a seed funding round led by E44 Ventures, an Israel-leading climate tech fund. It also saw participation from Axon Partners Group, Deutsche Telekom Hubraum Fund, BNV Partners, other investors, and existing angel investors. phelas specializes in the development ...

The Pitcairn Islands Marine Reserve, one of the largest on Earth, was established in March 2015 after years of collaborative efforts. Beginning in 2011, the Pew Environment Group's Global Ocean Legacy project worked with the Pitcairn islanders to create this marine sanctuary. In 2012, a National Geographic expedition assessed the health of the ...

"Phelas" Liquid Air Energy Storage (LAES) offers many features that cannot be covered by conventional technologies. We use air and gravel as the main storage medium - both materials are universally available and, unlike lithium-ions, less hazardous and less resource-geographically dependent. The technology offers a decisive cost advantage ...

Phelas is developing an energy storage system that works with liquified air. The aim is the sustainable and decentralized storage of power that is produced by renewable resources and available around the clock.

Louise Phelan's global expertise is recognised through her senior independent board membership of Ryanair, and her leadership of several Fortune 500 companies over the last three decades (former CEO of Phelan Energy Group; former Global Vice President at PayPal, former Senior Manager at GE Money).
