

Poland moveit solar container

What is a self-unloading mobile solar container?

Self-unloading mobile Solar Container. Our Solar Containers are designed in a way to maximize ease of operation. It's not only meant to transport PVs but also to unfold them on site. It is based on a 20' sea container. The efficient hydraulic system helps quickly prepare the Solar to work.

How does a mobile solar container work?

The mobile solar container can be brought on a single truck. It can then be lowered to sit flat on the ground with hydraulic lifting gear. Once on the ground, the folded-up solar unit first emerges from the top. And then, step-by-step, unpacks itself into a full working solar array.

Where can a mobile solar container be shipped?

You can easily ship it to any location in the world. In order to improve container mobility, we recommend additional container lifting jacks. Mobile Solar Containers open up new possibilities in areas with limited access to electricity. Easy transport combined with ease of use makes it a perfect solution to satisfy energy needs in remote areas.

Why should you choose a mobile solar container?

The efficient hydraulic system helps quickly prepare the Solar to work. Because of their construction, our containers offer unmatched flexibility and mobility. Great protection for the sensitive solar arrays against storms, vandalism, and all kinds of possible threats. Mobile solar containers application visuals.

What are the benefits of putting a solar array into a container?

One of the key benefits of putting the solar array into the container is mobility. You can simply transport this unit into even the most remote locations and start to harvest energy within minutes. SunBOX 35A at InterSolar and MSPO fairs in 2019. This year we've been showcasing our solution during two international tradeshows.

Longest transit time to Poland. The longest transit time to ship a container to Poland is the route Norfolk - Gdynia, with an average of 51 days. The next longest routes are New York - Gdynia, with an average of 49 days and New Orleans - Gdynia, with an average of 47 days. Shortest transit time to Poland
