For this purpose, each Power-Blox consumes a standby power of 7W - 10W in idle mode, depending on the operating mode and wiring. In order to prevent the battery from discharging due to the standby power in poor sunlight, for example during the winter months, we recommend switching off the Power-Blox with the main switch when not in use.

The mobile Power-Blox technology allows for risk diversification over a project portfolio by utilising capacity there where it's needed. As the Power-Blox technology is mobile, Power-Blox can be removed when demand is low. Thus, generation capacity can be transferred between villages without incurring costs for underutilisation.

Visions of everyone fulfilling their personal dreams. The story of Power-Blox began with one man and his vision to improve the scope and opportunities of people in sub-Saharan Africa and now Power-Blox is actually energizing the visions of many people worldwide. What we do. In line with this vision, since its foundation in 2015 Power-Blox AG ...

Sie sichern sich in wenigen Schritten bei Power-Blox AG eines oder mehrere Solarmodule und bezahlen für jedes Modul eine einmalige Gebühr von CHF 560.- Sobald genug Interessenten gefunden werden konnten, installieren wir alle Module auf einem gemeinsamen Dach in Laufenburg. Die Energie der Module wird Ihnen gemäss Ihrem Bezugsrecht ...
