

Does Rwanda have a geothermal project?

Exploratory drilling on three wells for geothermal resources to power project has been active since mid-July 2013. Rwanda's Water and Sanitation Corporation (RWASCO) supplies water to Kigali City and all urban centres of Rwanda. Major problems with water pipelines in rural areas were reported by the World Bank in 2004.

Why should you choose Reco?

Dependable system ensuring continuous energy generation. Pioneering suitable incinerators for superior combustion performance. Advanced AI technology to monitor and mitigate methane efficiently. RECO is recognized as a global authority in advancing 'Smart Industry' through cutting-edge methane mitigation technology and strategic investment.

How much energy does Rwanda need?

Electricity currently meets only about three per cent of Rwanda's energy needs. The rest of the energy supply comes from biomass (2007), with per capita consumption remaining low.

What is the telecommunications industry in Rwanda?

Telecommunications revenue contributes around 4.7 per cent of the country's GDP (2007). Liquid Telecom and MTN dominate the mobile market as the largest companies in Rwanda's liberalised telecommunications market. Data services are still in development (see box for a PPP that will bring 4G and cloud computing to Rwanda).

Does Rwanda have a telecommunication system?

Although information and communication technologies in Rwanda are well established in urban areas, with fixed phone lines, mobile telephones and internet services, telecommunication penetration into rural areas is still relatively low. Telecommunications revenue contributes around 4.7 per cent of the country's GDP (2007).

How much tin & tungsten is being used in Rwanda?

According to Rwanda's Development Board, only about a quarter of potential output is being used. It has identified opportunities in quarries specifically useful for construction, such as those dealing with tin, tungsten, coltan, gold and various precious stones, including diamonds.
