So why a promised boom now? One of the main drivers has been the plummeting cost of renewable energy -- particularly solar power. Scott McGregor, CEO of the UK based RedT Energy, says he knew 17 years ago that vanadium flow "machines", as he insists on calling his energy storage systems, would become commercially viable one day.

UK-headquartered redT, which makes energy storage systems based on the redox flow technology said yesterday that it has sold a 300kW / 1MWh "hybrid" energy storage system to Melbourne's Monash University in Australia. The company said this marks two firsts: the delivery of Australia's first flow-lithium hybrid system and redT's first ...

Neil O"Brien, Chairman of redT energy said: "redT energy and Avalon are two companies at the forefront of the energy storage revolution. The merger of these two leading players to become Invinity Energy Systems creates a world leader in the fast growing, global energy storage market with our proven disruptive alternative to lithium-ion technology.

The deal remains subject to shareholder approval with the new company set to be valued at around £57.7 million (US\$70.95 million). A press release issued in the UK claimed that vanadium flow batteries of the type made by Invinity are "a key competitor to existing lithium-ion technology in the rapidly growing global energy storage market".
