Name RENOVA, Inc. Established May 30, 2000 Representative Director President & CEO Yosuke Kiminami Capital 11,325million JPY(Sep 30,2024) Sales 44,748million JPY(consolidated, FY3/2024)

Generation capacity of the energy storage system: 15MW: Storage capacity: 48MWh: Commencement of business: October 2025 (planned) Operating company: Idemitsu Kosan Co., Ltd.

RENOVA's mission is to create green and sustainable energy systems for a better world. Based on this mission, we are working to create a sustainable society by driving the development and operation of renewable energy power ...

RENOVA uses wood chips from domestic unused timber or forest residue, as well as wood pellets and palm kernel shells (PKS) from overseas as biomass fuel. Characteristic of Biomass Power Generation Through photosynthesis, chloroplasts of plants absorb carbon dioxide (CO₂) from the air and utilize it to grow the plant's body.

Capacity: 75.0MW: Estimated annual power production (kWh): Approx. 500million kWh (equivalent to approx. 170,000 households) Fuels: Wood pellets, palm kernel shells (PKS) and domestic unused material

Decarbonization in rapidly growing countries and regions is essential for tackling the environmental issues facing the world. To promote decarbonization, RENOVA has established bases in Singapore, South Korea, Vietnam, the Philippines, and Indonesia, and is developing projects while keeping a close eye on the characteristics of renewable energy resources and ...

See the company profile for RENOVA, Inc. (9519.T) including business summary, industry/sector information, number of employees, business summary, corporate governance, key executives ...

RENOVA aims to resolve energy and global warming issues and revitalize local communities and societies by developing and operating core power sources utilizing renewable energy together ...

RENOVA develops and operates renewable power plants utilizing existing energy resources in each region

Renova inc Niue

and provides decarbonization solutions in Japan and overseas. Message from the CTO RENOVA aims to be a driver of renewable energy sector engineering and a leader in decarbonization solutions.

RENOVA, Inc. RENOVA Investor Relations CEO Message to Shareholders and Investors; Business. Business; Our Business; Development Story; Our Power Plants; Solar Photovoltaic Power Generation; Wind Power Generation; Biomass Power ...

RENOVA's Project Process. RENOVA engages in all processes of renewable energy power generation projects, from planning to operation. The following provides an overview of RENOVA's project process flow, from the internal feasibility study to activities after the start of power generation, such as installation of an observation platform for local elementary and junior high ...

RENOVA's mission is realize "societal transformation through energy transformation." One after another, talented individuals with different ages, genders, nationalities and skillsets who share this vision and have a challenging spirit are joining the RENOVA team. We intend to further expand this platform that is RENOVA.

The sun. The wind. Oceans, forests, and land. The power and bounty of nature is everywhere, high above our heads and underneath our feet. At RENOVA, our job is to harness it, carefully and sustainably.

1 The equipment is displayed in gross value without considering our company's equity interest. * 2 Internal assessment completed regarding the project's viability, preliminary investments in place as required for initial development. Projects may be terminated in the future depending on the results of further investigations and assessments.

Name: PT RENOVA RENEWABLES INDONESIA: Established: November 22,2022: Address: Revenue Tower, 19F, District 8 Jl. Jendral Sudirman Kav 52-53 (SCBD) Jakarta Selatan 12190

RENOVA aims to protect the environment and revitalize local economies and societies using renewable energy and by working together with local communities to establish new core power sources. Our Business. RENOVA is a developer and operator of renewable energy power generation facilities, including solar, offshore and onshore wind, biomass ...
