

Who manages the electricity transmission system in Romania?

The electricity transmission system in Romania and the interconnection system with its neighboring countries is managed and operated by Transelectrica SA company (the Romanian TSO). They also manage the market operation, the grid and market infrastructure development, and the security of the national energy transmission system.

Does Romania have a nuclear power plant?

Romania placed a heavy emphasis on nuclear power generation. The country's first nuclear power plant, the Cernavoda Number One located near Cernavoda, opened in 1993. Two reactors were operational in 2007 when atomic power generation was an estimated 21,158 million kilowatts, or 23.1 percent of total electric power.

What type of power does Romania have?

Electric power in Romania is dominated by government enterprises, although privately operated coal mines and oil refineries also existed. Accordingly, Romania placed an increasingly heavy emphasis on developing nuclear power generation. Electric power was provided by the Romanian Electric Power Corporation (CONEL).

Does Romania have a goal for non-biological renewable fuels (RNFBO)?

equivalence of GHG emission reductions. Despite Romania's commitment to achieve 3.5% advanced biofuels in the sector by 2030, there are no sub-targets for non-biological renewable fuels (RNFBO), indicating a lack of consistency with the European objectives, which
