

Rotomat storage system Vanuatu

What is the Hänel rotomat® storage carousel?

The Hänel Rotomat® storage carousel makes use of the available room height and creates up to 60 % more storage capacity thanks to its compact design. This means costly warehousing space can be used more efficiently. Work time slashed The Hänel Rotomat® storage carousel brings the required parts to the retrieval area in just a few seconds.

What is a Hanel rotomat ® storage system?

The Hanel Rotomat ® storage system is a dynamic solution that uses vertically rotating shelves to bring stored items to the system operator. Vertical Carousel Modules are a series of carriers attached in fixed locations to a chain drive.

How do I contact Hänel rotomat®?

Call +1 (412) 787-3444 or fill out this form - we will respond as quickly as possible. I have read and accept the data privacy policy for the purpose of processing my request.*Don't fill this field! Hänel Rotomat® carousel storage solutions are available in customized options with special features to fit the needs of your business storage.

Where are rotomat® carousel & Hänel lean-lifts® made?

Today Rotomat® carousels and Hänel Lean-Lifts® are produced in three manufacturing plants- and exported worldwide. Hänel has distributors in over 60 countries across the globe. Innovation and performance, dynamics and ideas, new technologies and team spirit have made Hänel one of the leading providers of storage and organization systems.

What is automated storage and Retrieval System (AS/RS)?

This automated storage and retrieval system (AS/RS) consists of rotating vertical carousels with shelves or trays for storing items. How it works: These carousels rotate horizontally to bring the desired item to the access point, improving storage efficiency and retrieval speed.

Can rotomat ® be integrated with an ERP or WMS system?

An individual Rotomat ® or network of Rotomats ® can quite easily be integrated with a higher-level host ERP or WMS system. The web service-based technology enables a link between the host, (SAP for example) and the machine's controller without the need for middleware. Users can request items or specific shelves directly from the Controller.
