

Saint Barthélemy thinkeco power

What is thinkeco power?

ThinkEco Power, a startup based in Vancouver, Canada, is tackling society's misconceptions about public transportation, specifically those that are sustainable. Stephen Kong, the company's founder, has utilized his passion for e-mobility and transportation to spearhead the development of a battery-powered ultra-light rail transit.

Can thinkeco power solve a transit problem?

ThinkEco Power's patent pending modular transit system is poised to solve this issue as it is actively rallying for private funding to initiate development. "Unlike traditional transit systems that are cost and time intensive to build, ThinkEco's offering can be operational in under two months.

Why is thinkeco power launching a modular transit system in Qatar?

ThinkEco Power and its partners have successfully launched this modular, eco-friendly transit system in Doha, Qatar, and are working on several other projects across Canada and the UK. Funding has been difficult to obtain due to concerns about safety and vested interests in protecting popular transit solutions, such as the diesel train market.

Does thinkeco have CIB?

Kong said ThinkEco remains committed to privately funding and moving the pilot project forward, with or without CIB. He said ThinkEco and Evie Autonomous Ltd. signed a memorandum of understanding to collaborate on research and development, and manufacturing of personal rapid transit and ultra-light rail train systems in Canada.
