A diversified portfolio of solar, wind and diesel was considered optimal in helping Saint Lucia reach its goal of 35 per cent renewable energy penetration by 2020. Such collaboration between a utility company and government is unusual in the region, and another way in which Saint Lucia is spearheading change.

The 3MW solar farm meets about 5% of St. Lucia's electricity demand and will reduce the volume of fuel purchased by LUCELEC by about 300 thousand gallons per year. LUCELEC uses approximately 20 million gallons of fuel per year. The solar farm builds on the work LUCELEC has been doing with grid-tied roof top solar PV systems since 2009.

The Caribbean Island of St. Lucia is known for its beautiful beaches, lush rainforests, and colorful coral reefs. But for some of the almost 200,000 people that live on the island, another incredible resource is affecting their daily lives -- the nearly 15,000 solar panels that are producing clean, reliable, electricity from the island's first utility-scale solar farm.
