

Who are Savills Energy?

Savills Energy is one of the country's principal consultants for renewable energy projects in the UK and has one of the most experienced teams in wind planning. There is no such thing as a typical wind energy project and each requires a blend of different skills.

What is Savills energy saviq?

SavIQ is integrated with the Global Real Estate Sustainability Benchmark (GRESB) platform, allowing the easy transfer of data for annual GRESB reporting. Why should I engage with Savills Energy?

Who are Savills wind energy developers?

Savills has worked with several UK developer wind energy projects, including npower, RES Limited, Ecotricity, Enertrag, Airvolution, and Infinergy. Savills has a proven track record in wind energy development, gained through the establishment of Infinergy, a joint venture wind development company, in 2003.

How can saviq help commercial landlords & tenants reduce electricity costs?

Our team of experienced consultants help commercial landlords and tenants to reduce electricity costs by procuring 100% renewable energy at the most competitive deals on the wholesale energy market. In addition, through smart metering, our clients can manage their electricity consumption in real-time via our online platform, SavIQ.

Who is Savills in wind energy?

Savills is a company with a proven track record in wind energy development. They established Infinergy, a joint venture wind development company, in 2003. Savills is involved in wind energy through Infinergy. On and offshore wind is set to remain a significant contributor to the UK's energy mix and is supported by both the Feed in Tariff and the Renewables Obligation.
