

Bob Viers, P.E. is a Senior Vice President and a Project Director for our SCS Energy division. He is the Lead Design Engineer for many types of energy projects and supervises the design or design/construction of almost all of SCS Energy's landfill gas power generation projects and renewable natural gas projects.

Many plants designed and built by SCS produce green energy from renewable biomass fuels including wood waste, TDF, bagasse and paper-mill sludge. Much of the fuel used in these plants would otherwise go to landfills and decompose into CO₂. The top 5 reasons customers choose SCS for their energy, construction and maintenance solutions:

SCS is an employee-owned environmental consulting and construction firm that designs and implements sustainable environmental solutions. SCS is a full-service provider. We study challenges and design solutions; we remediate, ...

Jeff joined SCS Energy in 2019, leading the process engineering team responsible for the design of biogas to renewable natural gas & energy facilities. He has over 20 years of experience in energy and renewable natural gas (RNG) project development. His background is in chemical process engineering and a wide array of engineering and ...

Die scs energie AG nutzt brachliegende Flächen für die Entwicklung und den Betrieb von Kraftwerken zur nachhaltigen Energieversorgung. Damit liefern wir sauberen Strom und leisten zugleich einen Beitrag gegen den fortschreitenden Flächenverbrauch. Jetzt mehr erfahren!

Our industrial energy management experts can identify improvements to a wide variety of processes and systems, targeting our investigations to best suit the needs of the customer. SCS helps our clients by identifying and addressing the major consumers of energy by performing: Compressed air audits; Compressed air leak surveys; Energy team training

The landfill gas-to-RNG plant designed by SCS protects the environment while providing cost-effective renewable cleaner-burning energy solutions. SCS Energy is a practice of SCS Engineers specializing in biogas, anaerobic digestion, renewable natural gas and energy systems for industrial and agricultural operations.

SCS Engineers designs and builds systems that capture, purify, and compress natural gas for injection into pipelines or liquefy the natural gas (LNG) for transport. ... Co-digested materials include manure; food waste (i.e., processing, distribution, and consumer-generated materials); energy crops; crop residues; fats, oils, and greases (FOG ...

Southwestern Community Services strives to empower low income people and families. With dignity and respect, SCS provides direct assistance, reduce stressors, and advocate for such persons and families as they lift themselves ...

SCS Engineers is excited to announce the appointment of Vice President Jeffrey J. Grill as the new Business Unit Director of SCS Energy. SCS Directors are responsible for geographic business areas or, in this case, a ...

Construction Driven Engineering Services. SCS utilizes our expansive experience to improve the overall constructability of the systems we engineer. Our full line of design services include: 2D & 3D Design Foundations Structural Boiler Pressure Parts BFB and Vibrating Grate Boiler Package Boilers Material Handling Ash Conveying Screw, Drag & Pneumatic Conveyors Storage Silos ...

The electrical current flows from the panels down to your solar inverter, which converts the energy generated from your panels (DC) into usable energy for your home (AC). Get a Free Solar Quote Monday: 8:00 a.m - 6:00 pm

SCS Energy Conservation consists of the Weatherization Assistance Program, the utility-managed Home Assistance Program, and the LIHEAP Building Weatherization Program. The Energy Conservation Program is designed to ...

Bapco Energies Unveils BeVentures and Appoints Areije Al Shakar as CEO Bapco Energies, a leading force in Bahrain's energy transformation, has announced the establishment of its new subsidiary, BeVentures, alongside the appointment of ...

This document presents Montserrat's Energy Report Card (ERC) for 2020. The ERC provides an overview of the energy sector performance in Montserrat. The ERC also includes energy ...

March 23, 2006 . Long Beach - SCS Energy, a division of SCS Engineers, has been awarded contracts to design, construct, and operate two 3.2 MW landfill gas-fired power plants. The projects are located in Medford, Oregon, and Atlanta, Georgia. Each contract calls for SCS to design and construct the projects on a fast-track basis, in order to meet deadlines embodied in ...

SCS is an employee-owned environmental consulting and construction firm that designs and implements sustainable environmental solutions. SCS is a full-service provider. We study challenges and design solutions; we remediate, build and operate environmental and energy projects and systems; and we monitor a wide range of environmental control ...

SCS Energy Conservation consists of the Weatherization Assistance Program, the utility-managed Home Assistance Program, and the LIHEAP Building Weatherization Program. The Energy Conservation Program is designed to help reduce heating and other energy costs for income-eligible households by improving living conditions and providing warmer ...

Renewable Energy. A large portion of the energy we consume could be renewable. Renewable energy is energy that can be naturally replenished (sun, geothermal, etc.), and it can be used to power electrical systems and to heat and cool buildings. There are growing opportunities to generate and use energy resources such as geothermal and solar.

The Montserrat Energy Unit is charged with the mandate of ensuring that the public is well aware of energy efficiency and conservation, developing a modern reliable and sustainable energy infrastructure, ...

Ash and Fuel Handling Systems. SCS will design and build material handling systems custom tailored to your individual requirements and specifications. Our systems include: - Underpile Drag Chain Reclaimers - Drag Chain Conveyors - Screw Conveyors - Belt Conveyors - Live Bottom Metering Bins [...]

Landfill Gas and LFGE National Experts: LFGE and Biogas to Energy: Jeff Grill Gas Collection and Control Systems (GCCS): Eric Peterson and Justin Stevenson LFG Modeling: Alex Stege SCS Engineers is a national leader in planning, permitting, investigating, designing, constructing, and operating landfill gas (LFG) control and recovery systems.

Indianapolis, IN -In August 2019, SCS Energy broke ground on construction of a 4,000-scfm landfill gas to renewable natural gas (RNG) plant in Indianapolis. Indy High Btu, LLC engaged SCS Energy to build the RNG plant under an engineer/procure/construct (EPC) agreement. Indy High Btu, LLC is jointly owned by Kinetrex Energy, Southside ...

SCS Engineers has one of the longest and most successful Biogas practices in the United States primarily in landfill gas to energy (LFGE) and digester gas-to-energy (DGE). Our clients attribute our quality to SCS Energy's, our practice specializing in waste gas utilization; combined with our expertise in solid waste management and compliance.

SCS reviews your checklist and supporting documentation to help you identify gaps in conformance and areas for improvement. Receive an evaluation audit The SCS auditor conducts an on-site audit, which includes an opening meeting, physical inspection of the site, review of documents and records, interviews with personnel, and a closing meeting
