

Is Gambia ready for a new era of renewables?

Gambia: strong international support for a new era of renewables with inauguration of historic 23 MWp solar plant. A significant strategic project with strong substantial economic and social impacts, the recently inaugurated solar photovoltaic plant in Jambur is poised to supply electricity to approximately 18,500 households.

How will interconnected power infrastructure affect rural energy services in the Gambia?

The effect of a highly interconnected power infrastructure on rural energy services in The Gambia is uncertain, as most people will continue to rely on decentralised systems.

Can communities benefit from renewable electricity support in the Gambia?

Communities who do not have access to the electricity network are one of the main groups with potential to benefit from renewable electricity support. However, community investment in the Gambia presents serious challenges. It is difficult for communities to access finance and develop the skills and knowledge required.

Are there re technology standards in the Gambia?

There are currently no Re technology standards in The Gambia. However, the draft FiT and PPA mention general applicable codes and standards that the Re plant should comply with. It would be worth creating specific standards and codes for Re technologies to ensure adequate quality, design, safety, operation and maintenance of equipment.

SEMCO operates on a global scale, with renewable energy projects that include PV solar, waste to energy, concentrated solar and battery storage. SEMCO has consulted on projects located in Jamaica, Oman, Algeria, Cameroon, Vietnam, ...

The government has taken a number of steps: establishing The Gambia Renewable energy Centre (GReC); adopting a policy of zero import duty on Re/ee technologies; and recently drafted a ...

Increasing investment into clean and reliable renewable energy for The Gambia is a top priority of the government. Due to its strategic location and ideal conditions, The Gambia is ideally suited ...

Increasing investment into clean and reliable renewable energy for The Gambia is a top priority of the government. Due to its strategic location and ideal conditions, The Gambia is ideally suited for investment into the Solar Energy sector.

Energy demand in The Gambia has increased by 5.5% per year in recent years and today's connection of the new 23 MWp solar plant to the national energy grid will ...
