What is Google Project Sunroof?

Google wants to make installing solar panels easy and understandable for anyone. Project Sunroof puts Google's expansive data in mapping and computing resources to use, helping calculate the best solar plan for customers. Project Sunroof computes how much sunlight hits your roof in a year.

Does Project Sunroof have solar data?

We currently have solar data for portions of 50 states and Washington DC. See if we've got you covered. Project Sunroof is a solar calculator from Google that helps you map your roof's solar savings potential. Learn more, get an estimate and connect with providers.

How does Project Sunroof work?

Project Sunroof utilizes Google Earth and Google Maps 3D imagery to create a digital model that looks at the direction a roof is facing, the angle of the roof, and shade factors to determine how effective a rooftop solar system would be. How accurate is Project Sunroof?

How much data does sunroof process?

Sunroof processes roughly 1 petabyte (1,000 terabytes) of data: height and color for 43 million homes; weather information; about 1,000 state and local incentives; and hundreds of local electricity rates. Over the past 3 years, Sunroof has grown from a part-time project to a full-time job for Elkin and his team.

Project Sunroof is a new Google project that wants to make the daunting task of navigating solar panel installation simpler by providing financial advice and stats on what solar energy could do ...

Google Sunroof permite analizar la luz solar que recibe cualquier techo y calcular la cantidad de energía que podría generar paneles solares en una ubicación específica, facilitando la incorporación de energía solar desde el inicio.. Este ...

Important: To use Google Wallet on Fitbit, you must have a Fitbit device and be in a country where it's supported. To find out which banks and cards work with Google Wallet on your Fitbit device, select your country or region below. To quickly search for your bank or card, use Ctrl + f.. If you do not have a Fitbit device, you can also use your phone or smartwatch to pay wherever ...

Project Sunroof puts Google's expansive data in mapping and computing resources to use, helping calculate the best solar plan for customers. Project Sunroof computes how much sunlight hits your roof in a year.
