

Could Northvolt be a big EV battery company headquartered in Europe?

Northvolt has been their best shot at building a big, thriving EV battery business headquartered in Europe. Were the company to fail, ongoing progress in battery technology could make it even harder for another European company to attempt the same feat.

How will Europe respond to the Northvolt Saga?

People involved in the Northvolt saga said options were narrowing for Europe to address its dependence on China and other parts of Asia for the technology and materials that will be critical as the automotive industry transitions to electric vehicles.

Can Northvolt compete with other Chinese battery makers?

If it was going to have a chance of competing with Contemporary Amperex Technology Co. and other Chinese battery makers, Northvolt needed to grow fast. The company amassed billions of dollars in debt and equity, secured using \$55 billion of contracts from some of Europe's biggest car and truck makers.

Is Northvolt a homegrown EV battery champion?

A partner of major European automakers, Northvolt produces lithium-ion batteries for the blooming electric vehicle industry, which has recently been rocked by intensifying competition from the likes of China. The Stockholm-based business has long been regarded as Europe's best hope of building a homegrown EV battery champion.

Will Northvolt be restructured?

Northvolt Ett, the company's flagship battery gigafactory in Skellefteå in north Sweden, will remain operational, the business said. It added that the restructuring process will ultimately help Northvolt's long-term mission to create a Western industrial base for battery production.

Where is Northvolt based?

Workers walk at the site of the Northvolt Ett factory in Skellefteå, north Sweden on February 23, 2022. "This decisive step will allow Northvolt to continue its mission to establish a homegrown, European industrial base for battery production," said Tom Johnstone, interim chairman of Northvolt's board.

To others, batteries are enabling whole new products without precedent or comparison. To all, batteries are powering a revolution - disrupting the ways of the old with new, smarter solutions. If batteries change rules of the game, then a clean, green battery is a new game altogether...

Traditional battery equipment manufacturers are not experts in building machine learning solutions. While both battery R&D and manufacturing are data heavy -- a characteristic that lends itself to machine learning -- the industry has barely scratched the surface of what the integration of machine learning solutions could mean

for its activities.

Backed by EU funds, it will build Europe's first factory of the kind in Subotica, Serbia, aiming to reach a capacity of 16 GWh per year. By 2030, Europe will need 14 times more batteries than it produces today. The demand ...

The main reason for this is that there are basically no products available. As soon as there is more supply on a large scale, electrification will be a very attractive alternative. I think that electrification will take over rapidly and that underground mining will be ...

Battery-grade nickel-manganese-cobalt (NMC) blend recovered by Northvolt through the recycling of battery materials. The Revolt process explained Northvolt's battery recycling process involves several steps, all of which play a role in ensuring the safe and effective processing of materials.

Northvolt proceeds with discussions with eight Swedish and two Finnish municipalities to identify the optimal site for a large scale battery production facility. Physical preconditions, logistics, local business climate and the ability to attract highly skilled labor have been particularly important in the selection process.

Solar and wind power, electric cars, saunas, and cranes. Batteries are crucial in remaking our grid into the clean, distributed, flexible and robust system our future needs - and at a cost past solutions simply can't match.

This is Northvolt's second integrated Sustainability & Annual report. It outlines what we are doing, how we are doing it, and the challenges we face as we work to enable the future of energy. Northvolt reports its sustainability work for 2023 in accordance with Global Reporting Initiative (GRI) Standards.
