

Who is Wayu energy?

We specialise in the origination, development, financing, construction, and optimisation of solar PV assets across Southeast Asia. Wayu Energy is an investment platform established to focus on renewable energy solutions, including solar, wind, and hybrid systems across Southeast and Northeast Asia.

What is Wayu energy's strategy?

Wayu Energy's Strategy: Invest in or acquire late-stage development or operating assets across its core markets. Diversify the asset class across utility scale solar, C&I solar, floating solar, energy savings solutions, as well as hybrid solutions in different sectors ranging from manufacturing, retail and distribution to telecom.

What is Slovakia's national energy and Climate Plan?

Slovakia's National Energy and Climate Plan sets an ambitious target of achieving a 19.2% share of renewable energies in gross final energy consumption by 2030.

Is biomass a viable energy source in Slovakia?

Biomass currently dominates electricity generation from renewables, followed by biogas, solar, and hydropower. Despite its high potential, wind energy remains largely untapped in Slovakia due to its perceived instability and regulatory hurdles.

Why is wind energy untapped in Slovakia?

Despite its high potential, wind energy remains largely untapped in Slovakia due to its perceived instability and regulatory hurdles. Since 2009, the construction of wind power plants has almost completely halted, with two small wind parks existing in Cerov and Myjava.

Can Slovakia use nuclear energy for peaceful purposes?

We are one of the first countries to use nuclear energy for peaceful purposes. We also must extend our knowledge in the field of SMRs. Slovakia currently has five nuclear reactors generating about half its electricity, with one more reactor under construction.

15 · State ownership vs state oversight. Politicians and analysts in Slovakia have mixed opinions about EPH's growing influence. Opposition parties argue for greater state ownership ...

Slovakia Energy. See also: Slovakia Electricity. Energy Consumption in Slovakia. Slovakia consumed 726,428,917,000 BTU (0.73 quadrillion BTU) of energy in 2017. This represents 0.12% of global energy consumption. Slovakia produced 252,264,663,000 BTU (0.25 quadrillion BTU) of energy, covering 35% of its annual energy consumption needs.
