OverviewElectricityGeneralEnergy planFuel sourcesClimate changeSee alsoExternal linksElectricity generation is mainly provided by nuclear power (36.2% in 2019), hydroelectricity (29.1% in 2019), and coal (27.9% in 2019); the three sources accounting for 93.2% of total electricity generation. Minor sources of electricity generation, each contributing less than 4% of total electricity generation, are natural gas, solar photovoltaic (solar PV), and biofuels. Following steep declines in use since 1990, Slovenia eliminated the use of oil for generating electricity in 2019. Renewable energy
