

Does smart grid work in the UAE?

As illustrated in Figure 6, the paper begins by analyzing two international case studies and then presents a local case study in the UAE that implemented the smart grid concept on both a local and government level, in order to gain insights into the challenges and lessons learned.

What are the challenges associated with Smart Grid policy in UAE?

In the first section, this paper outlines a literature review including information about the UAE's energy consumption and smart grid technology, followed by a discussion of three major challenges associated with smart grid policy, namely socio-culture, stakeholders' involvement, and government association.

Why do governments need a smart grid system?

Globally, governments realize the importance of updating electric energy grids and establishing smart grid systems. The smart grid system (SGS) combines connected networks and the technological era, providing several methods to produce power from multiple sources.

Does India have a smart grid?

India is also actively working on its smart grid prospects. The Government of India has created a Smart Grid Task Force Smart Grid Vision for the country that intends to address national problems, such as low access to electricity, reliability, and quality of supply, as well as include renewable energy in the energy mix [35].

How can we promote smart grid development?

While there is a need to change policies that will encourage smart grid development directly, changes to secondary policies are also possible to promote smart grid growth and development indirectly, such as promoting renewable energy, increasing energy security, and improving energy efficiency.

What is a smart grid?

A promising long-term industry transformation solution is the next-generation electric power system called "smart grids" [5]. A two-way flow of both electrical power and information is expected to revolutionize the generation, storage, transmission, and distribution of electricity under the SGS [6].

The project was a major first step forward towards developing the Emirate of Abu Dhabi into a Smart City by automating utility meters in the city of Abu Dhabi and Al Ain. The ...
