Bermuda's Road to Clean Mobility and Energy. Bermuda has committed to 85 percent renewable energy by 2035. To achieve this, the nation has committed to 21 MW of solar, 60 MW of wind, and 100 percent electric public transport by 2030\* -- reducing harmful emissions, slashing energy costs, and increasing local resilience.

The potential for solar energy to be harnessed as solar power is enormous, since about 200,000 times the world's total daily electric-generating capacity is received by Earth every day in the form of solar energy. Unfortunately, though solar energy itself is free, the high cost of its collection, conversion, and storage still limits its exploitation in many places.

The average daily incident shortwave solar energy in Bermuda is essentially constant during June, remaining within 0.2 kWh of 6.3 kWh throughout.
