

What is Solar City MalmÃ¶?

The Augustenborg solar project was the starting point for Solar City MalmÃ¶; which operates all over MalmÃ¶;. In spring 2009, a wind power plant was installed at the local school.

Are green roofs a good idea in MalmÃ¶?

Green roofs have now spread throughout MalmÃ¶;, helping to reduce the urban heat island effect during heat waves and providing habitat for migrating birds. Another exciting initiative begun in Augustenborg district was a study separating food waste to make biogas.

How do green roofs work in MalmÃ¶?

The next measure was to implement green roofs. There are now over 9,000 square meters of green roofs that absorb rainwater, clean the air, and provide insulation in the district. Green roofs have now spread throughout MalmÃ¶;, helping to reduce the urban heat island effect during heat waves and providing habitat for migrating birds.

Deliver value to citizens and local businesses through a sustainable city concept The challenge is to develop competitive solutions while adapting them to tomorrow's opportunities Page 23
