

What are the benefits of solar energy in Eritrea?

The government of Eritrea has been making efforts to promote the use of alternative sources of energy, especially solar energy, to mitigate the problems associated with the use of fossil fuel. A major benefit of solar energy is that it does not pollute the environment and saves money in the long run even if its installation cost is quite high.

Why should Eritrea invest in a solar plant?

This initiative aims to address the energy needs of Eritrea while promoting sustainability and reducing carbon emissions. The solar plant is anticipated to contribute to the nation's energy independence and support its commitment to renewable energy development.

Why did Eritreans need solar energy?

Mr. Aklilu added that renewable energy, especially solar energy, was back then a novel technology to Eritreans, and, therefore, they had to learn how to install big solar energy plants to generate sufficient power to supply energy to many villages and farms.

Does Eritrea have solar power?

Eritrea's weather, characterized by long sunny days throughout the year, makes it suitable for harnessing solar power. Data from the wind and solar monitoring stations installed in many parts of Eritrea show that the country has a great potential, around 6 kWh/m² of solar energy.

What is Eritrea's main source of energy?

Eritrea's major source of energy is petroleum, which drains the foreign currency reserves of the country and is globally a major cause of pollution. The government of Eritrea has been making efforts to promote the use of alternative sources of energy, especially solar energy, to mitigate the problems associated with the use of fossil fuel.

Which country has the largest solar power plant in the world?

The Noor Solar Complex in Morocco is a 500 MW solar park, which is the biggest concentrated solar power plant in the world. Eritrea's major source of energy is petroleum, which drains the foreign currency reserves of the country and is globally a major cause of pollution.
