

Solar now prices in Jersey

Will the price of solar energy come down in Jersey?

The JE boss says that if similar developments are built in other parts of the island, then the price of electricity produced by solar panels is more likely to come down. JE currently has two other sites in Jersey earmarked for ground-mounted solar energy production and is also working on installing more roof-based solar panels across the island.

Does Jersey have solar panels?

JE currently has two other sites in Jersey earmarked for ground-mounted solar energy production and is also working on installing more roof-based solar panels across the island. Earlier this week, JE increased islanders' electricity tariff by 7.5% from January 2025, adding around £2 extra per week to the average household bill.

Will a ground-mount solar panel installation reduce energy prices in Jersey?

Jersey predominantly relies on energy imported from neighbouring France. Credit: ITV Channel Jersey Electricity's (JE) CEO says a ground-mount solar panel installation on the island will help reduce energy prices in the long term.

Could a solar farm boost Jersey's energy security?

Bosses said the plans for the 2.7 hectare site, meant electricity would be returned to the grid in a process which would "increase Jersey's energy security". A solar farm in Jersey could power 17% of the parish's homes if planning is approved, electricity bosses say.

Will Jersey be able to produce solar energy in the winter?

Mr Ambler added that while Jersey sees enough sunshine in the summer to produce solar energy, the island will still need to be connected to the wider grid in the winter when daylight hours are significantly reduced.
