The National Assembly of Bulgaria has adopted changes to the territorial planning law to simplify and speed up the installation of solar panels for the production of energy for self-consumption. Currently, the procedure to install solar panels and become a prosumer can stretch to one year, but now it is expected to accelerate, local media reported.

The solar thermal is used for heating or generating electrical power. On the other hand, solar cells are mainly used to produce energy. Low costs. The basic advantages of solar PV lie in the lower cost and the high efficiency. PV modules (solar panels) are built from silicon solar cells (photovoltaic cells).
