Off grid photovoltaic systems are completely independent of the grid. The energy produced by the solar panels are collected and stored in special batteries that are rechargeable. A device called a charge controller regulates the raw DC power to prevent overcharging and protect the batteries. Batteries store energy in the form of Direct Current, therefore another device called an inverter ...

Nova Olinda Solar Plant. Located in Ribera do Piauí in Brazil, this solar plant is the largest in that country. It is capable of generating up to 600 GWh per year and has a production capacity of 292 MW. This energy is produced thanks to its 926,985 solar panels. It is estimated that this plant is capable of powering up to 300,000 homes per year.
