This is due to how solar panel systems are fundamentally structured: The typical solar panel system generally consists of 3 parts - your panels (of course), inverter and your sub DB box. In order for your solar panel system to convert solar energy from the sun into usable electricity, the solar panels have to be first connected to your inverter.

Why Are Singaporeans Considering Installing Solar Panels? According to the latest sources from EMA, there has been a whopping 7,698 within just the first 6 months of 2023, which is already approximately 16% more than that in 2022 (6,635).. Out of the 7,698 solar panel systems, 38.6% of these were actually residential installations, amounting to about 2,971 in total.
