Solar panels and controllers Guam

r/TeslaMotors!

The great solar energy debate continues to rage. The prevailing opinion is that while it's ok in theory to attach solar energy panels to our roof, the upfront financial costs render it impossible for the average family. At first glance and without bothering to research the matter further, there seems to be more than a ring of truth to it.

If you were to get a 20A PWM controller, you would be able to regulate a solar panel bank of up to 320W for 12V batteries, and 640W for 24V batteries. The PWM controller can also be used to connect solar panels to a battery bank of 12V batteries, provided that the batteries are the same size and that they are in good condition.
