Is solar energy a good investment in Cambodia?

According to the International Renewable Energy Agency (IREA), access to solar energy in Cambodia is 11 times higher than it was just a few years ago. Approximately one third of a million households, or 8.4% of overall Cambodia households, are benefiting from off-grid or micro-grid solar (Cambodia Socio-Economic Survey).

How much solar energy is used in Cambodia in 2021?

The solar energy source usage in 2021 has increased almost double compared to the amount used in 2020. By 2023, 7 solar power plants with a total capacity of 495 megawatts will be operational, contributing about 20% of Cambodia's total energy supply.

Does Cambodia have solar power?

However, considering the country's historical energy mix, the existing solar capacity appears positive. As of 2011, Cambodia had no solar power plants, and solar energy was not a part of the country's energy mix. Cambodia's current installed solar capacity is slightly over 400 MW, but the country is targeting 3.1 GW by 2040.

What are Cambodia's goals for solar energy?

With these opportunities in mind, the government has set ambitious targets for expanding solar energy in Cambodia, aiming to inject 2 GW of solar energy into the grid by 2030. This goal is supported by a range of policies designed to facilitate the growth of the solar sector, including incentives for investment and development.
