

Our next-gen concentrated solar power (CSP) plants capture the sun's energy at a higher temperature (970C) than regular CSP and store it in simple ceramic pellets. The result is inexpensive renewable storage that doesn't use costly batteries or messy molten salts. This higher-temperature capture results in higher efficiencies at a lower cost.

For example, the company is a current panel member and installer for the Australian Capital Territory Solar Power Schools Programme, which aims to install solar power systems in all primary and secondary schools in the territory; the Mount Maunganui-based firm has already completed 31 system installations out of 80.
