

Solar rebates for business Norway

Does Sweden have a solar rebate program?

The Swedish Energy Agency (Energimyndigheten) has devoted around SEK4.8 billion to the solar rebate program for the 2009-21 period. The agency said in June that Sweden's operational PV capacity increased from 689 MW at the end of 2019 to 1 GW at the end of 2020.

Why is Norway a good choice for solar energy solutions?

This has led to Norway to become an expert in devising solar energy solutions for out of the way places. Safedesign has designed a rooftop safety system that eliminates the need for scaffolding and makes solar panels more affordable. Industry was also bitten by the solar energy bug.

Are Norwegian solar panels eco-friendly?

The ecological footprint of solar panels made with materials from Norway is therefore extremely small. REC Solar's factory in Fiskå in southwestern Norway has even been awarded a certificate for production of the world's cleanest silicon. Not only is Norwegian silicon production the world's cleanest, it is also the world's most energy efficient.

Is Norway a good place to buy solar cells?

This passion for nature has made Norway one of the most attractive markets for solar cells. Although some of the appeal of cabin life is to take a time-out from technology, electricity is still needed to power lamps, radios and, now, mobile phone chargers.

Why are solar cells so popular in Norway?

Norwegians love to be outdoors. They flock to their cabins in the mountains, in the woods or by the shore to spend their weekends or holidays in beautiful, peaceful surroundings. This passion for nature has made Norway one of the most attractive markets for solar cells.
