

Solar traders Norfolk Island

Does Norfolk Island have too much solar energy?

That's pretty impressive given its remoteness and a population of 1,849. But this uptake has also caused some headaches in managing Norfolk Island's electricity network, with too much solar energy goodness generated at times. The Tesla battery system installed in December 2020 has helped out on that front.

Will Australian government help Norfolk Island's diesel-based electricity cost woes?

The Australian Federal Government has stepped in to give the folks on Norfolk Island some relief from their diesel-based electricity generation cost woes. Norfolk Island is a tiny island (3,455 hectares) in the South Pacific Ocean.

Is there a feed-in tariff for solar owners?

As far as I can tell, there's no feed-in tariff for solar owners. The Australian Government is pitching in \$5.3 million to improve Norfolk Island's electricity network, including the rollout of more solar panels and supporting infrastructure to ensure electricity generation and demand are balanced.

Does Norfolk rely on diesel?

Like many island communities, Norfolk has traditionally relied on diesel for electricity generation. The community is in the process of shifting entirely to much cheaper and cleaner renewable energy, but that transition can't happen fast enough.
