

Solinc solar Tanzania

Where are Solinc solar panels made?

Solinc, formerly known as Ubbink East Africa, manufactures solar panels of 20W to 250W. It is also involved in the assembly of complete home solar kits that include batteries, phone chargers and LED lights. More than 80% of the company's solar panels are sold in Kenya, with the remainder retailing in Uganda and Tanzania.

How many solar panels does Solinc make?

Founded in 2011, Solinc makes solar panels from 20W to 300W, and also assembles complete home solar kits that comprise batteries, phone chargers and LED lights. The plant's recent manufacturing capacity is 140,000 solar panels annually, and it hopes to double this by the next 18 months to meet rising demand.

Where are solar panels made in Kenya?

In 2011 a group of investors opened Kenya's first solar panel manufacturing plant in Naivasha, about a 90 minute drive from the capital Nairobi. Solinc, formerly known as Ubbink East Africa, manufactures solar panels of 20W to 250W.

How many solar panels are made in East Africa?

Its current manufacturing capacity is 140,000 solar panels per year, and it is now set to double this within the next 18 months to meet rising demand in East Africa. Over the past decade, the prices of solar panels have gone down, making them more affordable for households in off-grid areas.

What is the biggest challenge for Solinc?

The biggest challenge for Solinc has been changes in regulations on solar products and the components used in manufacturing. Between 2013 and 2015, Kuper says VAT and duty regulations changed three times. One foreign investor in Solinc opted out of the business due to these uncertainties.
