At Sony, we aim to create better products for both our customers and the environment. Our environmental plan "Road to Zero" 0 means understanding product impact over the whole life cycle including resource procurement, manufacturing, logistics, use by customers, recycling, and disposal, and pursuing environmental initiatives at manufacturing sites.

Energy storage systems will be able to receive income from dispatching their energy in the country's National Electric System market. The conversion of a coal plant into 560 MW of molten salt-based energy storage has additionally been proposed, and Canadian Solar has won a tender to deploy solar-plus-storage with 1 GWh of battery storage.
