

Spain solar energy panel factory

Will Iberdrola build a solar module factory in Spain?

Spanish energy giant Iberdrola has joined forces with PV module maker Exiom Solution to build a factory in northern Spain. The facility is set to begin commercial operations by the end of this year. From pv magazine Spain Iberdrola said this week that it is now working with Exiom Solution to build a solar module factory in Langreo, Spain.

When will a solar panel factory start in Spain?

The first large solar panel factory in Spain is scheduled to start up next spring. Among the most significant recent developments, those standing out are the arrival, assembly and installation of specialised equipment for its manufacture. This is complex, heavy, high-volume machinery, prepared inside the factory in several batches of equipment.

How will a new solar panel factory benefit Spain?

If successful, the factory will have a production capacity of 1.6 GW per year, equivalent to 3 million panels, and it could cover a third of the current demand in Spain, according to Iberdrola. "This new industry will boost local economic development with the creation of 500 direct jobs", the company said.

Will Iberdrola & Exiom bring solar energy to Spain?

The solar panel factory in the mining basin will come into operation this year, 2023. The agreement with Exiom is part of Iberdrola's efforts to attract part of the value chain linked to renewable energies to Spain. Specifically, solar energy. The aim is to turn Spain into a spearhead to lead this emerging sector from Europe.

Will Spain be a spearhead for solar energy?

Specifically, solar energy. The aim is to turn Spain into a spearhead to lead this emerging sector from Europe. The Asturian region of Langreo will host the site for the construction of what will become the first large photovoltaic factory in Spain.

What is solar + storage Spain?

The Solar + Storage Spain event, which combines a two-day conference, exhibition space and workshops, will take place in Barcelona on May 10 and 11. The conference's "Going global" panel will address how markets in Europe, China and the United States are competing to attract talent, companies and industry.

Iberdrola España and the Asturian business group Exiom continue their steps towards the definitive opening of the photovoltaic module factory in Asturias. The first large ...
