

What are Sri Lanka's energy policies & strategies?

Sri Lanka's energy policies and strategies strongly focus on developing conventional and nonconventional renewable energy sources for generating power. Promoting domestic energy resources has become one of the main policy components in Sri Lanka.

Is Sri Lanka a viable alternative energy source?

Moreover, Sri Lanka has also identified the potential for wind, bioenergy, and solar as alternative energy sources in the past two decades. However, the current contribution from these three renewable sources in comparison to hydroelectricity remains significantly low.

Are Sri Lanka's renewable research activities being burdened by a lack of accurate data?

Sri Lanka's overall renewable research activities are being burdened by the lack of accurate and contemporary data, especially in line with renewable energy generation and utilization.

Does Sri Lanka use wind power?

Sri Lanka's history of using wind power dates back to the 3rd century B.C. and as showcased in Fig. 2 the country currently boasts over 5000 km<sup>2</sup> of windy areas that are considered to have excellent wind resource potential areas (Sri Lanka Sustainable Energy Authority Ministry of Power and Energy, 2019).

Can 'Gliricidia sepium' be used for biomass energy generation in Sri Lanka?

Local researchers have also identified the potential for using 'Gliricidia sepium' a multi-purpose, rapidly growing, and highly adaptive short-rotation coppicing tree typically growing wild throughout Sri Lanka as a viable option for biomass energy generation in the country (Atapattu et al., 2017; Dissanayake, 2021).

Does Sri Lanka have solar energy?

Furthermore, Sri Lanka has also seen an increase in the energy generated through bioenergy sources (geothermal, biomass and waste energy) with this segment producing approximately 250 GWh of energy by 2020. However, despite its potential, solar energy has had an uninspiring growth until 2016.
