

What is the energy strategy in Kosovo?

The main policymaking document in the energy sector in Kosovo is the Energy Strategy (hereafter: the Strategy). The Strategy is drafted by the Ministry of Economy, covers a period of ten years and has to identify the main challenges that the sector faces and outline the policies to develop the sector.

What is the energy mix in Kosovo?

The other generation capacities in Kosovo come from hydropower plants while renewables are less represented in the energy mix although their representation has been rising in the last decade. Currently, Kosovo has 137 MW installed wind capacity and 10 MW installed solar capacities.

How secure is electricity supply in Kosovo?

Security of electricity supply depends on a fleet of aged coal-fired power plants built between the 1960s and 1980s owned and operated by the Kosovo Energy Corporation, one of the biggest public enterprises in the country. The uptake of renewables has been slow with a limited number of support measures in the last decade.

Is electricity a profitable business in Kosovo?

Electricity generation represents its main business, while its dominance in the sector has made it one of the most profitable state-owned enterprises in Kosovo. Kosovo initially planned to develop new generation capacities, competitively contracting a private company to build and operate a lignite-fired power plant.

Why is Kosovo at an early stage of energy transition?

The fact that Kosovo is at an early stage of its energy transition means that it is still possible to ensure that the main policies and interventions can be just and equitable to all groups.

Does Kosovo need a decarbonization strategy?

In Kosovo, there is a consensus that the only path for the energy sector in the country is toward decarbonization. Political parties that are not part of the Government criticized the Strategy for not being sufficiently ambitious or comprehensive, without questioning the overall policy direction it promotes.

Summit Fuel Energy Solutions in belief.. Summit Fuel Energy Solutions is an international energy company present in more than 14 countries worldwide, including several of the world's most ...

As Kosovo explores sustainable energy alternatives, leveraging its wind and solar energy potential emerges as a promising avenue for achieving both environmental and ...

Summit Energy Evolution Limited | 295 followers on LinkedIn. SEEL is a subsidiary of Sumitomo Corporation which is highly active in CCS, low carbon, and net zero energy projects. | Summit ...
