How many batteries does a sunvault have?

The SunPower SunVault offers one type of battery, the 13 kWh battery. You can install up to two if you need more backup power, giving you a maximum 26 kWh of energy capacity. The SunVault system includes the battery itself, as well as the Hub+. The Hub+ is what controls the energy flow and dictates how the stored energy is used.

Is the sunvault a good battery?

While the SunVault is a relatively new battery, it is a trustworthy option because, like the Equinox system, it will be built, warranted, and serviced by SunPower. The SunPower SunVault works seamlessly with a SunPower Equinox solar system.

What is sunvault ® storage?

Provides up-to-date information about system status, energy use and in-app alerts. Powered by lithium iron phosphate battery packs and an advanced battery inverter, SunVault ® storage integrates with your SunPower Equinox ® system to provide energy, monitoring and intelligence to optimally power your home--with or without grid power.

How much does a sunvault battery cost?

The SunVault is a bit pricier than other solar batteries we've looked at. A single SunVault unit costs between \$16,000 to \$20,000, and a double SunVault unit starts at \$26,000. These price estimates also include the cost of installation, according to SunPower.

Does sunvault automatically charge a battery?
