

Suriname verterra energy

At Verterra Energy, we're on a mission to harness the power in the worlds rivers, canals and oceans. To accomplish this, we are commercializing our first device called VOLTURNUS, a pioneering water-power technology that deploys in harmony with the current to capture baseline, zero emission electricity.

Verterra has developed proprietary generator technology to enable reliable performance for devices that can be submerged for years at a time, with little to no maintenance. The feedback from this first round of testing ...

Verterra has developed proprietary generator technology to enable reliable performance for devices that can be submerged for years at a time, with little to no maintenance. The feedback from this first round of testing will be utilized to ...

We're on a mission to help achieve 100% renewable energy by 2050. Verterra Energy is developing a new waterpower technology called Voltturnus, that is designed to harness the power flowing in rivers and oceans.

At Verterra Energy, we're on a mission to harness the power in the worlds rivers, canals and oceans. To accomplish this, we are commercializing our first device called VOLTURNUS, a pioneering water-power technology that deploys in ...

Our mission is to bring renewable energy to the 1.2 billion people currently without power. Our goal is to become the go-to solution for developing regions, while helping to reduce their ...

Verterra Energy looks to transform hydro power with its modular device "Voltturnus", in a quest to help power remote and developing regions.Follow us on socia...

Our mission is to bring renewable energy to the 1.2 billion people currently without power. Our goal is to become the go-to solution for developing regions, while helping to reduce their dependence on fossil fuels, and furthering humanitarian efforts globally. Advisors From: oBoeing oDepartment of Energy oWinrock oDefense Alliance

Voltturnus by Verterra Energy, Inc. is revolutionizing the way underwater technology can be used to produce renewable energy.And check out these videos below:...

Voltturnus uniquely harnesses the power in flowing water, with ultra high efficiency- maximizing the amount of kinetic energy that is converted into zero emission electricity. AVAILABILITY Utilizing the 24/7 availability of flowing water in rivers, canals and oceans, combined with a self-clearing design, arrays of Voltturnus provide baseload ...

Suriname verterra energy

Verterra Energy is reimagining how to harness the power of flowing water on our planet. Our mission is to empower people with the energy they need to create the future they want, while preserving the environment we all need.

Verterra Energy is a company focused on renewable energy technology within the energy sector. Its main product, Volturus, is a modular system designed to generate electricity by harnessing the power of flowing water in rivers, oceans, and canals.
