

Swift solar Tuvalu

What is Swift Solar?

Swift Solar is a company founded in 2017 by international pioneers of perovskite technology with a shared vision for the future of solar energy. They believe that Swift Solar is a next generation lightweight and efficient solar technology that has vast untapped potential to reduce inequity and protect planetary health in the face of global climate change. They believe that today's solar technology is good but not good enough.

What is the Tuvalu solar power project?

The Government of Tuvalu worked with the e8 group to develop the Tuvalu Solar Power Project, which is a 40 kW grid-connected solar system that is intended to provide about 5% of Funafuti's peak demand, and 3% of the Tuvalu Electricity Corporation's annual household consumption.

What was the first large scale solar system in Tuvalu?

The first large scale system in Tuvalu was a 40 kW solar panel installation on the roof of Tuvalu Sports Ground. This grid-connected 40 kW solar system was established in 2008 by the E8 and Japan Government through Kansai Electric Company (Japan) and contributes 1% of electricity production on Funafuti.

Where does Tuvalu electricity come from?

Tuvalu's power has come from electricity generation facilities that use imported diesel brought in by ships. The Tuvalu Electricity Corporation (TEC) on the main island of Funafuti operates the large power station (2000 kW).

At Swift Solar, our vision is to revolutionize the solar energy industry by providing innovative and cutting-edge photovoltaic solutions that are not only efficient and sustainable but also lightweight and flexible.

The Asian Development Bank (ADB) and the Government of Tuvalu have officially launched a 500 kilowatt solar rooftop system in Funafuti, along with a 2 megawatt-hour battery energy storage system (BESS). This project will provide clean and reliable electricity to Tuvalu's capital and help the country meet its renewable energy goals.

Swift Solar was founded in 2017 by international pioneers of perovskite technology with a shared vision for the future of solar. We believe that solar energy has vast untapped potential to reduce inequity and protect planetary health in the face of global climate change.

The Asian Development Bank (ADB) has commissioned a 500 kW solar rooftop project in Tuvalu's capital, Funafuti, along with a 2 MWh battery energy storage system (BESS).

At Swift Solar, our vision is to revolutionize the solar energy industry by providing innovative and cutting-edge photovoltaic solutions that are not only efficient and ...

The NZ Ministry of Foreign Affairs and Trade funded project was the first to combine solar generation and battery storage on the island. It is likely to be a model for further projects as Tuvalu moves towards its goal of 100% renewable energy generation by 2025.

The Asian Development Bank (ADB) and the Government of Tuvalu have officially launched a 500 kilowatt solar rooftop system in Funafuti, along with a 2 megawatt ...

Swift Solar was founded in 2017 by international pioneers of perovskite technology with a shared vision for the future of solar. We believe that solar energy has vast untapped potential to reduce inequity and protect planetary ...

Tuvalu, an island nation midway between Hawaii and Australia, has commissioned a new solar-plus-storage project with the ADB, featuring a 500 kW, on-grid ...

OverviewTuvalu's carbon footprintTuvalu Energy Sector Development Project (ESDP)Commitment under the Majuro Declaration 2013Commitment under the United Nations Framework Convention on Climate Change (UNFCCC) 1994Solar energyWind energyFilmography Renewable energy in Tuvalu is a growing sector of the country's energy supply. Tuvalu has committed to sourcing 100% of its electricity from renewable energy. This is considered possible because of the small size of the population of Tuvalu and its abundant solar energy resources due to its tropical location. It is somewhat complicated because Tuvalu consists of nine inhabited islands. The Tuvalu National Energy Policy (TNEP) was formulated in 2009, and the Energy Str...

Tuvalu, an island nation midway between Hawaii and Australia, has commissioned a new solar-plus-storage project with the ADB, featuring a 500 kW, on-grid solar rooftop array and a 2 MWh BESS in the capital, Funafuti.

The Government of Tuvalu worked with the e8 group to develop the Tuvalu Solar Power Project, which is a 40 kW grid-connected solar system that is intended to provide about 5% of Funafuti's peak demand, and 3% of the Tuvalu Electricity Corporation's annual household consumption.

The NZ Ministry of Foreign Affairs and Trade funded project was the first to combine solar generation and battery storage on the island. It is likely to be a model for further projects as Tuvalu moves towards its goal of 100% ...
